We regularly conduct regulatory gap analyses and carry out operational and compliance reviews so that our clients can successfully navigate through the numerous laws and regulations that apply to their businesses.

We work with clients on licensing and various regulatory applications, business structuring and business conduct issues. We help clients design internal controls and we draft documents such as client and third party agreements, compliance manuals, dawn raid procedures and so on.

We advise listed companies, and their directors, on their obligations under the Hong Kong Listing Rules and under Hong Kong's securities laws.

We assist clients to establish offices in Hong Kong and also to exit from Hong Kong, handling various issues such as the application for or relinquishment of regulatory licences, dealing with counterparties and auditors and handling employees.

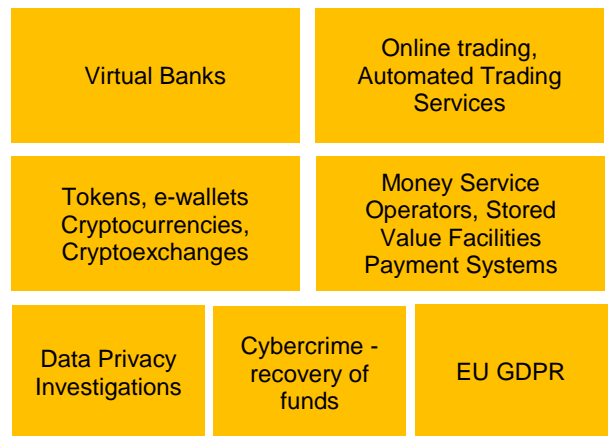

Here are some regulatory issues we have worked on:

Technology: Data Privacy, Cybercrime and Fintech

These are fast-growing areas of concern for clients and our work includes data privacy investigations, recovery of funds from cybercrime and regulatory investigations into tokens/cryptocurrencies/cryptoexchanges.

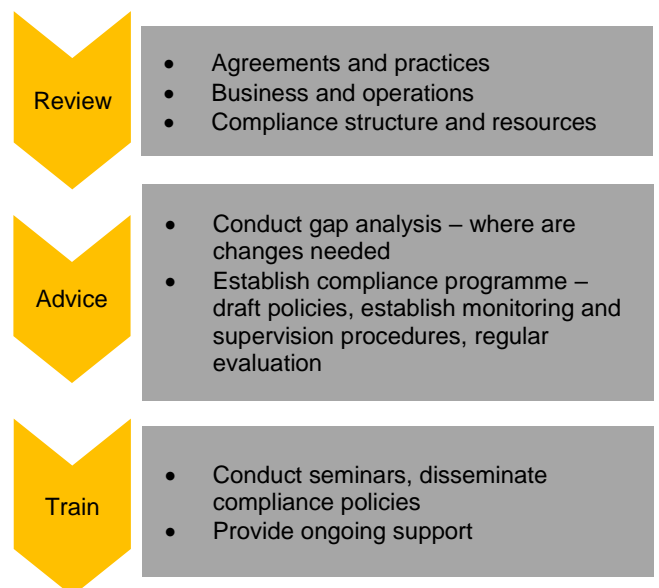

On the non-contentious side, we have assisted various international clients with their fintech initiatives, for example, cryptocurrencies, utilising blockchain technology, money service operators who work with cryptocurrencies and financial institutions who deal in or advise on digital assets.
